LASERS

CROSS-LINE LASERS

This self-levelling cross lasers project a cross-line, a separate horizontal line or a vertical laser line. The laser automatically levels itself in less than 6 seconds and with an accuracy between 0,5mm and 0,6mm. The automatic levelling can be switched off if you prefer to work with a diagonal cross for example. With a single button operation you can easily switch between all modes. These different options make the lasers perfect for all sorts of levelling and aligning applications. Whether you like to tile the wall or hang up frames, pictures, shelves, lamps, … it is all possible with the cross lasers with a working range of 12 up to 15m. To protect the self-levelling laser during transport or storage, the off switch also securely locks the laser.

WALL DETECTOR 4-in-1

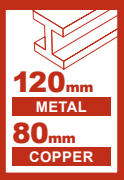

Be sure you drill holes at the right place and you don't damage electric pipes in the wall? Use this 4-in-1 Kreator wall detector. It detects copper, metals as well as wood. Moreover it has a moisture meter. This is practical when you want to make sure you don't start painting too early or you don't take a risk by laying your parquet.

LASER DISTANCE METERS

These digital lasers are your perfect partner for measuring distances up to 60m with a 2,0mm accuracy. They not only guarantee a precise measurement of length, but can also automatically calculate area and volume for you. Indirect measurements are also possible with the Pythagorean equation. In this way you can even determine distances if linear measurement isn't possible due to obstacles. Both laser distance meters fit on a tripod too.
