PRODUCT LINES

POWERPLUS

POWERPLUS EG

The E line offers an attractive mix of garden tools available at extremely competitive prices, with no compromise on basic quality standards. It has a modern look & feel and can be recognised by its compact design. The tools are perfect for the gardener who occasionally enjoys working in the garden.

POWERPLUS[®] HIGH QUALITY TOOLS

POWERPLUS XG

The X range is focused on the gardener born with green fingers, who can be seen frequently in his or her garden. The tools have an ergonomic design and are chosen for their excellent quality-price ratio. Besides, you decide whether you want to go for electric, gasoline- or battery-operated devices.

POWERPLUS[®] HIGH QUALITY TOOLS

POWERPLUS DPG

The battery platform Dual Power consists of 20V and 2x20V batteries, that you combine with a whole range of tools. It provides absolute freedom of movement and makes gardening easy. As battery and charger are sold separately, there's no need to buy a new battery for every tool.

POWERPLUS

POWERPLUS PRO

The premium Pro Power products are indispensable for green fingers, setting higher gardening goals. Pro Power materials assure an intensive and a long-term use and enable working in a secure and comfortable way.

POWERPLUS

PRO POWER

Designed for professionals.

DURABLE AND RELIABLE TOOLS

Pro Power is especially designed to meet the demands of a professional. The superior quality tools deliver a high performance and can handle the most challenging tasks. With Pro Power you can be sure of extremely durable and reliable tools.

The development of the new Pro Power line included close collaboration with professionals. This results in a first class quality line with high performances that can cope with the heaviest duties.

You want to work as a professional? Choose for the professional quality of Pro Power!

4-STROKE

LIGHT & COMPACT

Besides the regular 2-stroke devices, we now also offer **light and compact** garden tools which dispose very exceptionally of a **4-stroke motor**: a brush cutter, a leaf blower, a grass and a hedge trimmer. This type of motor mostly comes with heavier devices. So it's an opportunity to add light, yet powerful and durable equipments to your collection.

The choice for 4-stroke is very obvious: you'll be amazed about the **vibrations**, because there aren't nearly any. So you work in a more comfortable way, also because of the much **lower noise level** as a consequence of the lower rotation speed. This results in a **powerful motor** too? Definitely! You have thus both a powerful and a user-friendly tool in hands, that gets you going quickly with just one pull (**easy start system**).

You'll buy this equipment with a future perspective. Firstly, it has a **longer lifespan** than 2-stroke motors, since it **gets lubricated** for a smooth and durable operation and **you don't need to mix fuel with oil**. We also know the more the engine runs, the quicker it wears out. Secondly these garden tools are **environmentally friendly**. As power is generated once every 4 strokes and no oil is added to the fuel, the engines produce less pollution.

These garden tools will keep you working for the long-term with user-friendly compact devices.

20V BATTERY FOR 20V TOOLS

2x20V BATTERY 2x 20V BATTERY PACK INSIDE

20V tool uses
each pack one after
the other

40V tool uses
both packs together

BATTERY TECHNOLOGY

The higher the capacity, the longer a battery will run. The 20V battery has a capacity of 2000mAh. The 2x20V battery has a capacity of 2500 or 4000mAh when used on a 40V tool, but delivers an impressive 5000 or 8000mAh when combined with a 20V tool.

How is this possible? The 2x20V battery lends itself to both a series or parallel connection of its Li-ion cells. In a series connection (2x20V battery on 40V tool), each cell adds its voltage potential to obtain the double voltage of 2x20V. By connecting the Li-ion cells in parallel (2x20V battery on 20V tool), the result is an output with a double capacity: it will boost the capacity from 4000mAh to 8000mAh.

Dual Power is a new generation battery platform. It consists of a 20V and a 2x20V battery, that combine with a multitude of cordless tools.

The concept is simple but strong. The 20V battery fits on 20V Dual Power tools, the 2x20V battery activates 40V Dual Power tools. But here is where the real innovation steps in: you can also click the 2x20V battery on a 20V Dual Power tool. Doing so will drastically increase the runtime.

BRUSHLESS MOTOR

DISCOVER OUR EXTENSIVE RANGE OF BRUSHLESS TOOLS.

A brushless motor is a DC electric motor that functions without carbon brushes. Therefore it needs less maintenance, while having a longer lifespan. The brushless motor extends the battery's runtime up to 50%.

CENTRAL ADJUSTABLE HEIGHT SETTING

The central cutting height adjustment is an easy and user-friendly way to change the lawnmowers' cutting height, no tools needed. As a rule of thumb, it is recommended to cut maximum 1/3 of the grass' height. Therefore it is important to choose the correct height setting. The wider the range and the more pre-defined positions, the more precise the end result will be.

MULCHING FUNCTION

MULCHING FUNCTION

The lawnmowers' mulching function helps to maintain a healthy and green lawn. Mulch is a fine layer of fine cut grass that decomposes rapidly, putting nutrients back into the soil. It also protects your lawn from heat and draught, by retaining water more easily. Mulch gets made by re-circulating and re-cutting the grass clippings under the mowing deck, after which it gets forcibly returned to the lawn.

USE THE TAP OR ANY OTHER AVAILABLE WATER SUPPLY

The 20V pressure washer is equipped with a 6m long hose, which can draw water from remote sources, such as a lake, well or pond.

Therefore, this is Dual Power tool is perfectly suited for **cleaning road or mountain bikes** after a muddy ride. It can also come in handy **on holiday to give the car a quick rinse**.

The portable pressure washer can be attached to a regular tap as well, by using a standard garden hose.
