PLANING DEPTH ADJUSTMENT KNOB

CHIP CLEARANCE ON BOTH SIDES

DEPTH GUIDE

PLANER 910W

The electric planer from Powerplus Pro Power offers with its 910W motor plenty of power to satisfy the needs of the most demanding professional users. It has a light weight, a planing width of 82mm and an adjustable planing depth of 3.5mm. The planer has a rebate capacity of 12mm. Its metal base features a V-groove that is ideal for making chamfer-grooves.

The parallel guide can be adjusted precisely to fit every planing or rebating job. Wood chips and shavings are caught in the collection bag. The bag can be mounted on both the left and right side, preventing it from blocking the perfect view of the workpiece. Because it only weighs 3100g, the device is one of the lightest planers for professional use.

Its knives are powered by a conveyor drive. To simplify maintenance, the conveyor drive is located behind a detachable protective cover.

The POWP6011 meets all safety requirements and has an ideal heat dissipation to prevent overheating.

POWERPLUS

PRO POWER
