POWX1388 SOLDERING IRON 4V | 4400mAh

This cordless soldering iron is ideally suited for model building and an array of smaller soldering tasks. Because the battery operated tool doesn't need a power cable, it is ideal for use in hard to reach places and in places that do not have a power supply.

The cordless soldering iron has a short warm-up time. It is ready for use in just 60 seconds. Thanks to its lightweight design and a comfortable soft grip, it is an easy-to-handle tool.

The durable li-ion battery provides the necessary power and has a capacity of 4400mAh. That is sufficient to ensure a run time of about 60 minutes with a full charge. The soldering iron can be recharged with a USB cable.
