SUBMERSIBLE PUMP POWXG9502

This 350W submersible pump can pump clean or slightly contaminated water out of your basement, pool, pond, and more, at a flow of 5000 litres per hour and with just 5mm of water remaining.

The external floating switch ensures the submersible pump starts to work as soon as the water level in the room is too high. It will switch off again automatically when the desired water level has been reached. You get to choose the levels at which the pump starts or stops.

It can be submerged in up to 7m of water and is easy to use thanks to the ergonomic handle and 10m cable.

TECHNICAL SPECIFICATIONS POWXG9502		Features	Box content	Symbols
Rated voltage-frequency	230V~ 50Hz	• Carrying handle • Floating switch • Polypropylene pump housing • Leaves only 5mm of water behind	1x submersible pump	CHEMICAL SAFETY ✓ CE
Rated power	350W		1x manual
